

Invoixy — Features & Functional Guide

Product Walkthrough & User Manual | Invoixy GST SaaS Platform

Project Name: Invoixy

Tagline: Modern, GST-Compliant Billing & Invoicing SaaS

Reference Business Profile: Apex Electronics & Appliances (Mumbai, Maharashtra)

Live Production URL: https://invoixy.vercel.app

1. Project Overview (What is Invoixy?)

Invoixy is a web-based, production-ready invoicing application built specifically for small-to-medium retail and wholesale businesses in India. It solves the everyday headaches shopkeepers and business owners face when generating GST tax invoices:

1. **Manual Math Errors:** In traditional paper billing or spreadsheets, calculating CGST, SGST, IGST, discounts, and rounding off totals often leads to mistakes. Invoixy automates all calculations in real time.
2. **Speed & Customer Wait Time:** During peak retail hours, customers hate waiting for bills. With Invoixy's 1-Click Presets, a shopkeeper can pick a saved customer, pick a product, and print an invoice in under 30 seconds.
3. **Professional Branding:** Small businesses often have messy printouts. Invoixy renders an official, A4-standard Indian Tax Invoice complete with the store's high-tech logo, HSN codes, bank payment instructions, and warranty declarations.
4. **Cloud Accessibility & Zero Installation:** Runs in any modern web browser on laptops, desktops, tablets, or phones without requiring any software installation.

2. Real-World Business Persona: Apex Electronics & Appliances

To demonstrate practical business value during your presentation, Invoixy comes pre-configured with a realistic, high-volume retail electronics business:

- Store Name: Apex Electronics & Appliances
- Address: Shop No. 12–14, Ground Floor, Phoenix Galleria Mall, LBS Marg, Kurla West, Mumbai, Maharashtra 400070
- State & Code: MAHARASHTRA (State Code: `27`)
- GSTIN: `27AAEPA4829G1Z4`
- PAN: `AAEPA4829G`
- Contact Phone: `+91 98204 77319`
- Bank Remittance: HDFC BANK, Kurla West Branch (A/C: `50200084920194`, IFSC: `HDFC0000128`)
- Standard Invoice Prefix: `APEX` (e.g., `APEX/26-27/1`)

Why an Electronics Store?

Electronics retail is the best showcase for GST software because:

- Products span multiple GST tax slabs (e.g., 18% for computers & headphones, 28% for large air conditioners).
- Involves high-ticket items requiring precise serial numbers and HSN codes for warranty verification.
- Customers include both local walk-in retail buyers (Intra-state CGST + SGST) and corporate out-of-state buyers (Inter-state IGST).

3. Landing & Authentication Flow (`/login`)

When anyone visits Invoixy, they are greeted by a clean, modern sign-in screen designed for high security and frictionless onboarding:

A. Continue with Google (OAuth 2.0)

- One-click sign-in using any Google account.
- Once authorized, the user is automatically assigned their own private store, isolated from other users.

B. Business Email Sign-In

- For users who prefer not to link Google, typing a business email instantly opens or creates their dedicated store dashboard with a secure 30-day session cookie.

C. "Sign in as Demo" (Instant Cloud Sandbox)

- Crucial for your college presentation!
- Clicking "Want to test first? Sign in as Demo !" immediately opens a dedicated, pre-loaded demo store (*Apex Electronics (Demo)*).
- Multi-Device Sync: If your professor opens the demo link on their phone and you open it on the projector laptop, both devices open the exact same shared central demo store with pre-seeded invoices, products, and customers.

4. Main Navigation & Store Switcher

The top navigation bar provides instant access to every part of the application:

1. Brand Logo & Store Badge: Displays the Invoixy logo alongside an active store badge (*e.g., Apex Electronics & Appliances*).
2. Dashboard (`/`): Summary metrics, revenue totals, and recent activity.
3. New Invoice (`/invoices/new`): The primary billing workspace.
4. History (`/invoices`): Searchable invoice ledger and status management.
5. Customers (`/customers`): Preset buyer directory.
6. Products (`/products`): Preset product and HSN pricing catalog.
7. Seller (`/settings`): Company details, logo upload, and bank instructions.
8. Security (`/security`): Counter-lock and inactivity timer.
9. User Menu (Top Right): Displays the user's name, active store, and Logout button.

5. Dashboard Overview (`/`)

The Dashboard is the command center for the store owner. It provides:

- Metric Cards: Total Revenue Generated, Paid Invoices count, Pending/Unpaid Invoices count, and Total Invoices Issued.
- Quick Action Buttons: Direct shortcuts to create a new invoice or view sales history.
- Recent Invoices Table: Displays the 5 most recently created invoices with customer names, dates, amounts, and payment status badges.

6. The Core Feature: Invoice Creation Workspace (`/invoices/new`)

This is the most powerful page in Invoixy. On desktop screens, it provides a side-by-side interactive split view:

- Left Column: The data entry form.
- Right Column: A live, pixel-perfect A4 invoice print preview that updates as you type.

Section 1: Header Details

- Invoice Number: Automatically generated based on the store's prefix, current financial year, and sequence counter (*e.g., APEX/26-27/7*). Read-only during creation to prevent duplicate numbering conflicts.
- Invoice Date & Due Date: Native date pickers defaulted to today's date and a 30-day payment term.
- Payment Mode / Terms: Custom field (e.g., *IMPS / NEFT / UPI / Cash / Net 30*).
- Order & Dispatch Metadata: Includes Buyer's Order No., Dispatch Doc No., Dispatched Through (courier/transport), Destination city, and Delivery Note Date.

Section 2: Buyer (Customer) Details

- Saved Customer Dropdown: Click the dropdown to pick any saved customer (*e.g., Rahul Sharma*). All customer data (billing address, state name, state code, GSTIN) auto-populates instantly.
- "Save buyer as customer" Button: If entering a new walk-in customer manually, clicking this button immediately saves them to your database preset list for future visits.
- Delivery Address (Optional): Supports separate "Consignee / Delivery Address" when goods are billed to one address but delivered elsewhere.

Section 3: Line Items (Goods / Services Table)

- Saved Product Dropdown: Select from saved inventory (*e.g., Sony Bravia 55" TV*). Automatically fills description, HSN code, unit (*Nos/Pcs*), default price, and applicable GST rate.
- "Save as product" Button: Quickly save newly typed item descriptions and rates to the permanent catalog.
- HSN / SAC Code: 4-to-8 digit classification code required by Indian GST law for tax verification.
- Quantity, Unit & Rate: Unit price and quantity inputs.
- Discount %: Applies per-item percentage discounts before tax calculation.
- GST Rate Dropdown: Supports standard GST brackets: `0%`, `5%`, `12%`, `18%`, and `28%`.
- Add Row / Remove Row: Add unlimited line items to a single bill.

Section 4: Automated GST Tax Calculation Engine

- Automatic State Detection: When you pick a buyer, Invoixy compares the seller's state code (`27` - Maharashtra) with the buyer's state code:
 - * Intra-State (Same State): If buyer is also in Maharashtra (27), the engine automatically splits tax into CGST (Central GST) and SGST (State GST) (e.g., 18% total becomes 9% CGST + 9% SGST).
 - * Inter-State (Different State): If buyer is from Gujarat (24) or Delhi (07), the engine automatically switches to IGST (Integrated GST) (18% full).
- Round-off Toggle: Automatically rounds grand totals to the nearest integer rupee (*e.g., ₹94,399.88 rounds to ₹94,400.00 with a + ₹0.12 round-off line*).

Section 5: Real-Time Live A4 Print Preview

- True-to-Scale A4 Rendering: Scaled to fit comfortably on screen while maintaining exact print proportions (1:1.414 aspect ratio).
- Fit vs. 100% Modes: Switch between fit-to-width and actual print scale.
- Live Synchronization: Every keystroke in the form immediately reflects in the preview sheet.

7. Customer Presets Directory (`/customers`)

Manages regular clients and vendors:

- Pre-Seeded Real Profiles: Comes pre-loaded with realistic Indian retail and commercial customers:
 1. *Rahul Sharma* (Kurla West, Mumbai — Retail Customer)
 2. *Pooja Verma* (Andheri East, Mumbai — Interior Designer)
 3. *Amit R. Deshmukh* (Thane West — IT Contractor)
 4. *Mohammed Arif Khan* (Bandra Kurla Complex, Mumbai — Tech Consultant)
 5. *Sneha Kulkarni* (Dadar West, Mumbai — Architect)
 6. *Vikramaditya Rathore* (Ahmedabad, Gujarat — Commercial Client with IGST)
- Customer Card Details: Displays Customer Name, GSTIN, complete address, and State Code.
- Add New Customer: Modal form to save name, address, GSTIN, and state.

8. Product Catalog Presets (`/products`)

Manages the store's inventory and standard pricing:

- Pre-Seeded Electronics Catalog:
 1. *Sony Bravia 55" 4K Ultra HD Smart Google TV* (HSN: 8528, ₹64,990, 18% GST)
 2. *Apple MacBook Pro 14" (M3 Pro, 18GB Unified Memory, 512GB SSD)* (HSN: 8471, ₹1,99,900, 18% GST)
 3. *Samsung 1.5 Ton 5-Star Inverter Split Air Conditioner (Copper)* (HSN: 8415, ₹44,990, 28% GST)
 4. *LG 343L 3-Star Smart Inverter Frost-Free Double Door Refrigerator* (HSN: 8418, ₹38,500, 18% GST)
 5. *Dyson V12 Detect Slim Wireless Vacuum Cleaner* (HSN: 8508, ₹52,900, 18% GST)
 6. *Bose QuietComfort Ultra Wireless Noise Cancelling Headphones* (HSN: 8518, ₹35,900, 18% GST)
- Instant Auto-Fill: When chosen on an invoice, these presets eliminate repetitive typing and pricing errors.

9. Invoices Ledger & History (`/invoices`)

A comprehensive ledger of all invoices issued by the store:

- Global Search: Instant live filter by invoice number (e.g. `APEX/26-27/3`) or buyer name.
- Status Filter: Filter invoices by All, Paid, Part-Paid, or Unpaid.
- Direct Actions:
 - * View (`/invoices/[id]`): Open the detailed invoice view.
 - * Edit (`/invoices/[id]/edit`): Modify draft or unpaid invoices.
 - * Print / PDF: Direct one-click download of the invoice PDF.
 - * Delete: Secure removal with confirmation modal.

10. Single Invoice View & PDF Generation (`/invoices/[id]`)

- Detailed Invoice Breakdown: Displays the full Tax Invoice layout on screen.
- Payment Status Management: Record payments directly on the invoice (mark as Paid, update paid amount).
- Server-Side PDF Generation (`/api/invoices/[id]/pdf`):
 - * Built using pdfkit.
 - * Generates high-resolution, vector-crisp PDF files matching standard Indian Tax Invoice requirements.
 - * Includes the Apex Electronics logo, complete tax breakdown table, bank remittance slip, and amount in words.

11. Seller Settings & Branding (`/settings`)

Allows business owners to configure their store profile:

- Company Details: Company name, phone number, registered billing address, PAN, GSTIN, state name, state code, and custom invoice prefix.
- Branding & Logo Upload: Upload an image logo (PNG/JPG). Stored securely and printed on all invoice headers and PDFs.
- Bank Account Details: Bank name, branch, account number, and IFSC code for customer remittances.
- Declaration & Terms: Standard disclaimer and warranty policy printed on invoice footers.
- Database Backup & Restore: (Local development mode) One-click download of the SQLite database and safe restoration from file.

12. Accounting Data Export (`/api/export`)

For tax filing and accounting in tools like Tally or Excel:

1. Summary Export (`/api/export`): Downloads a clean CSV report listing all issued invoices, dates, buyer names, GSTINs, taxable amounts, CGST, SGST, IGST, and Grand Totals.
2. Detailed Line Items Export (`/api/export/lines`): Exports an itemized CSV report with individual product sales, quantities, rates, and HSN codes.

13. Retail Counter Security & Auto-Lock (`/security`)

Designed specifically for physical retail store counters:

- Inactivity Auto-Lock: Automatically locks the screen if the cashier steps away from the counter for a configurable timeout (e.g., 5, 15, or 30 minutes).
- PIN / Passcode Protection: Prevents unauthorized tampering with invoices or pricing when the terminal is unattended.

14. Summary of Key User Benefits

Feature	Business Problem Solved
Instant Presets	Reduces billing time from 5 minutes to 30 seconds per customer.
Automated GST Engine	Eliminates manual tax math mistakes and state code miscalculations.
Live A4 Preview	What you see on screen is 100% identical to the printed bill.
Multi-Tenant Demo Sandbox	Allows examiners and clients to test the live app instantly from any device.
Vector PDF Generator	Produces professional, GST-compliant tax invoices with embedded logo.
CSV / Excel Export	Simplifies monthly GSTR-1 tax filing for accountants.
